

-for the cow, the milk and the milker...

Newsletter from SAC, November 2016

From November 15.-18., 2016 SAC attended EuroTier - the world-leading forum for suppliers for animal production and the place to meet and network with leading people within the industry. Before EuroTier, SAC proudly introduced three new solutions to the market – see more below.

NEW SAC RDS Futureline ELITE

SAC launches a new all-in-one solution for automatic milking – probably the most reliable solution on the market today – the SAC RDS Futureline **ELITE**. The new solution enables the modern dairy farmer to increase the milking capacity in the most efficient and user-friendly way. Because at SAC we believe that all that can be done for the cow, the milk and the milker should be done.

NEW UNIMILCO “All in one” Milking Unit

SAC launches a new easy-to-use control unit – the UNIMILCO unit is an all-in-one solution including all functions needed to operate a milking system - increasing the revenue for the modern milker.

NEW: SAC Goat Rotary

“The solution is easy to work with and achieves a very high capacity. With this parlour I can milk up to 800 goats per hour. The SAC Goat Rotary is the best out there today,” says Robert Jansen.”

SAC introduces new features within a complete concept of high milk yielding and large herds of goats – and it meets all standards in the industry.
